## NOTES

The compilation of detailed traffic data is an important function of the Information Management Unit and is published by the Communications Department of Malta International Airport plc.

Passenger and airlines statistics cover both arrivals and departures and are represented as such in this publication unless otherwise indicated.

The statistics contained in this review may differ from other sources dealing with aviation traffic since they do not take into account flights not serviced by Malta International Airport plc such as certain private flights and military flights. Inter-island helicopter services are described as domestic traffic.

These statistics are therefore focused on commercial air traffic in Malta and represent a reliable source of information for the general public.

## LIST OF DEFINITIONS

### **Aircraft Movements**

An aircraft movement is an aircraft take-off or landing at Malta International Airport.

### **Passenger**

Every person over the age of two on board a departing or arriving aircraft but excluding crew members and passengers in transit.

### **Transit Passengers**

Passengers who arrive and depart from the airport with a flight bearing the same flight number. These are counted only once.

The 13th December heavy rain episode.

The Doppler Weather Radar scans various elevation angles while spinning around 360° of azimuth.

This is an image of the intensity of the returned 'echoes' in the horizontal and in the vertical. The cross section at the top of the image is taken on a west to east axis, and the cross section on the right is on a north to south axis.

## AETRA Monitor Report for 2004

The AETRA Global Monitor Report is a joint airport research study by the International Air Transport Association (IATA) and Airports Council International (ACI). It analyses the perceptions of over 84,000 international travellers and provides an up-to-date marketing index to measure the quality of service that the monitored airports provide.

The study covers key service elements of 49 airports of various sizes and ownership structures, from all five continents. 24 airports included in the report are from Europe, 13 from the Americas, 7 from Asia-Pacific, 1 from the Middle East and 4 African airports.

In the published report for 2004, Malta International Airport has once again scored significant results in overall passenger satisfaction. MIA ranked an excellent 5th place among the European airports and 2nd within the smaller airports category (less than 5 million passengers per annum), the second time in three years that MIA has ranked so high since its adherence to the monitor report. In the Overall Passenger Satisfaction survey for 2004, Malta International Airport ranked 13th among the 49 airports with a total satisfaction rate of 75%.
